PRACHA ERP R1

FULLY CUSTOMIZED ENTERPRISE RESOURCE PLANNING (ERP) SYSTEM,
WHERE YOU CAN INTEGRATE ALL YOUR MANAGEMENT PROCESSES INTO A SINGLE,
COHERENT INFORMATION SYSTEM.

GEAR UP WITH PRACHA ERP R1

CONTROL . SPEED . FLEXIBILITY . AFFORDABLE

The need to manage increasing volumes of information with less time and fewer resources represents a major challenge for your company today. The cost-efficient solution to this is an Enterprise Resource Planning (ERP) system, where you can integrate all your management processes into a single, coherent information system.
The ERP system organizes all internal flows while monitoring exchanges with all your external partners, including your customers, suppliers, and subcontractors. The ERP approach achieves unequalled speed, visibility and enablement throughout your organization and represents a strategic choice for developing the competitiveness of your company.
But most ERP solutions are much too complicated, unwieldy, and unsuitable for midsized companies. Pracha ERP R1 is different, because it combines all the advantages of ERP performance while maintaining simplicity, flexibility, and scalability in a fully integrated, cost-effective end-to-end solution.

PRACHA ERP R1 INTEGRATES ALL OF YOUR COMPANY'S INFORMATION AND BUSINESS PROCESSES WITHIN A SINGLE SOFTWARE SYSTEM AND DATABASE

It is a stand-alone software solution that uniquely links advanced functionality and complete data integration with an efficient workflow engine and user-friendly business and reporting tools

Pracha ERP R1 integrates all of your company's information and business processes within a single software system and database. It is a stand-alone software solution that uniquely links advanced functionality and complete data integration with an efficient workflow engine and user-friendly business and reporting tools—a compelling combination that gives your enterprise real-time control over all activities, and an ideal basis for making decisions in key areas.

Integrate all company management

Control processes with the workflow engine

Simple work procedures for users

Ensure flow control and traceability

Optimize your resources

Secure all transactions

Improve quality and reduce risks

Streamline Operations
Enhance Collaboration

Reduce Costs
Grow Your Business

An open exchange of information among employees is one of the key factors for a company's success. Pracha ERP R1 makes this collaboration easier than ever before. A completely web-based architecture ensures that the flow of company information is fast and secure. Also, flexible access options enable distributors, customers, and suppliers to access information conveniently wherever they are using a web browser. Finally, all partners can become an active part of your business.

Facilitate access to information	Explore new opportunities with partners	A communicative architecture

| **Improve Business Insight** |
| Reduce Costs |
| Grow Your Business |

It's not enough simply to have the right information at your fingertips. You have to be able to interpret it accurately. Pracha ERP R1 helps you make the most of your business information with convenient tools designed to optimally evaluate, compile, and present all your data. This ensures that every aspect offers maximum significance. Take advantage of the individualized design and evaluation options to consolidate the latest information in your enterprise and make faster, better-informed decisions at all levels.

Focus on the decision to be made, not on the tools that help make it	Track your key business indicators in real-time and focus on exceptions	Get the most from your information with advanced Business Intelligence functionality	Manipulate data and share reports with ease

Perform searches with precision and speed

Streamline Operations
Enhance Collaboration
Improve Business Insight
Reduce Costs
Grow Your Business

An efficient ERP solution only makes sense if it's affordable. Pracha ERP R1 is designed to dramatically lower typical ERP costs. Because it can adapt to your organization with little or no customization, Pracha ERP R1 lowers your costs from the very beginning of its implementation. These cost-saving results, combined with the wealth of functionality and advanced features included in the package, provide your business with the best value in today's ERP market. And a perfect way to minimize your IT costs in the long term.

First-class functionality at a low cost of ownership	Reduce installation costs	Reduce operating costs	Reduce recurring costs
